7. Click "Me" on the Home of the App for more services

- Voice Service: click on the corresponding speaker for the connection description.
- Other Services:
 - IFTTT: How to connect to IFTTT;
 - Value-added Service Orders: you can check the purchasing record of purchased value-added services;
 - AI smart detection: push the event picture reported by the smart camera;

- Video cloud storage: after purchasing the service, the device can encrypt and upload the video record data to the server, and the user can view the recorded video at any time on the App;
- Mobile phone notification: after purchasing the service, the device can automatically notify the user's mobile phone when the notification condition is triggered. The device is enabled for multiple-number notification, protecting the safety of you and your family any time and any where.

- Q: Fail to add device during net-pairing?
A: Please make sure the mobile phone and device are connected to 2.4GHz router. Make sure the correct Wi-Fi password is entered.
- Q: Still fail to add device after re-scanning?
A: If fail to add device, it is recommended to restart the device or power off the device, and try again.
- Q: The device cannot preview?
A: Check for weak Wi-Fi signal. You can place the camera close to the router. If it still doesn't work, reset the device, and add it again.
- Q: Why the device is still on the list after resetting the device?
A: The device resetting only resets the camera's network configuration and cannot change the configuration on the App. You must log in the App to delete the camera from the list.
- Q: How to connect the camera to another router?
A: First log in the App to delete and reset the device, and configure the device again through the App.
- Q: Why the device cannot identify SD card?
A: It is recommended to insert and remove the SD card after power off the device. Check if the SD card is under normal service conditions and the format is FAT32. The App shall suggest "could not find SD card" under unstable network of the mobile phone or the device.
- Q: The device is online and has an alarm event, but the mobile phone cannot receive the information?
A: First confirm that App allows notification in the settings of your mobile phone. Under normal circumstances, when an anomaly is detected, a message will appear in the notification bar of your mobile phone. Your should set a notification sound or vibration in your mobile phone.
- In addition, when viewing the real-time video in the App, you cannot receive alarm of the camera being viewed. Because the device defaults the camera being viewed indicating that the user is focusing on the monitoring video, and there is no need for an alarm.

Using the advanced intelligent alarm push algorithm to ensure that the alarm message will not be frequently, but the camera will record all the alarm messages and videos.

After-sale instructions

- Please refer to the real product, the manual is for reference only.
- The product is updated in real time, it shall upgrade without prior notice, please go to the official website for query.
- The manual contains the basic function description of the product, please check the operation.
- If there is any problem when using the camera, please contact the supplier or company in time.
- We have tried our best to ensure the comprehensive and accurate manual content. But there may still be deviation from the actual situation. If there are any questions or disputes, please refer to the final interpretation of the company.
- If you do not follow the instruction manual, any loss caused by it will be borne by yourself.

This manual is suitable for consumer products.
